About us

Revolutionizing the field of industrial refrigeration technology

Advanced Refrigerations Est. popularly known as :ARE” has been in business in the Kingdom of Saudi Arabia since 1994. Since beginning, we have proudly served Saudi Arabia in a wide variety of fields. Right from commencement, we used our expertise and skills to build the business utilizing our superb technical ability and outstanding customer service with a desire to build a business which would grow and succeed in the retail market. We have identified the area of installation and service and special attention was given to this area and thereby a platform was created to develop the business further.

Advance Refrigerations Est., has laid a strong foundation for the success by providing efficient and cost effective installation and service with innovative design solutions in the Refrigerations market.

Our installation team has packed up with highly experienced technically skilled workmen to ensure that the work is completed upto the maximum satisfaction of our customers.

Utmost care is taken right from small repair work to the largest construction projects and we provide turnkey installation too.

Features of ARE

The name to trust in commercial refrigeration market

Advanced Refrigerations provides installation, services, and repair for commercial refrigerators, freezers, and cold-rooms for commercial clients throughout Saudi Arabia. We sell commercial refrigeration equipment for industrial clients, restaurants, hotels, and supermarkets etc.

Advanced Refrigerations offers the capability to maintain and repair all types of domestic, commercial, and industrial refrigeration systems and also various mechanical services including the following:

- Refrigerated Cabinets.
- Butcher's Cold Plates.
- Industrial Refrigeration Plants.
- Commercial Refrigerators.
- High Humidity Produce Cold-rooms.
- Cold Rooms.
- Freezer Rooms.
- Industrial Refrigeration
- Process Cooling.

Mission

Believing in innovation, thoroughness, and passion

Our success relies on sustaining consistent growth through acquiring and retaining customers by delivering the highest level of customer service in conjunction with providing practical and economically feasible solutions that solve their problems.

Vision

Working to make environmental refrigeration a global standard

Our vision is to create and develop a refrigeration system throughout Saudi Arabia that is respectful of the environment, in order to make it a global standard for all sectors. We aim to be recognized as the most professional team of refrigeration products and services while providing reliable service and installation. We also look forward to leading the way towards more efficient and effective methods and procedures.

Values

- Refrigeration Systems employing Natural Refrigerants.
- Different types of Refrigeration compressors.
- Supply of all types of Refrigeration Spare Parts.

A design and equipment selection services are provided for any commercial or industrial refrigeration equipment.

ARE Supplies and Installation

Design and Construct

Advanced in refrigeration design, construction and maintenance

Advanced Refrigerations is rapidly progressing with their ability to create unique limitless designs. From the initial design and estimate to the construction period, and finally to the warranty and maintenance period, our construction team in conjunction with the service team can provide customers with the best solutions, whatever the requirements may be. This enables us to design, install, service, or repair any refrigeration systems with high efficiency. **Advanced Refrigerations** has been successful in completing major projects all over the Kingdom of Saudi Arabia.

Our Expertise

Experts are at the HELM of affairs

We understand the dynamics of each customer requirement and the variety of demands on its refrigeration systems. We help you with innovative designs that make the system more efficient, cost-effective and economical in long run, saving substantially on your power and maintenance cost. Industrial refrigeration is a lot about designing 'solutions' to specific requirements rather than trying to fit in the available products. In other words, what the user of industrial refrigeration needs is a 'customized cooling solution'. This precisely is the strength of **Advanced Refrigerations**.

Customer needs “Excellence” and our commitment also for excellence

Deep Freezers

Deep freezers are used for quick freezing and/or long-term storage of material. ARE deep freezers are designed with the best quality refrigeration system to meet the elevated standards of performance and controlled temperature storage.

Specifications:

Temperature: -20°C to -80°C
Volume: 30 liters to 8000 liters
Walk in freezers: up to 300 m

Environmental Chamber and Deep Freezer Features

- Electronic temperature controller
- Optional PID controller
- Reliable operation
- Energy Efficient
- Accurate temperature control
- Holdover capability

Application:

Food and beverages industry, ice cream plants, pharmaceutical & medical industry, measurement gauges and engineering industry, biotech and clinical applications, and testing purpose.

Cold Storage Rooms

Advanced Refrigerations offers a wide range of cooling and preservation solutions customized to suit any industry that requires storage of engineering products or perishable production over extended periods of time without compromising on quality.

Specifications:
Temperature Range: 15°C to -40°C
Volume: 8 m to 2000 m

Features:

- PUF panel rooms available with G.I./S.S sheet
- Reliable refrigeration system and robust construction designed for continuous operation
- Incorporation with various refrigeration
- Humidity control cold storages (Optional)

Application

Manufacturers of fresh food production of any kind, food processing units, pharmaceutical industries, seafood industries, dairy, and hospitality sectors including hotels, restaurants, and eateries.

Cabinets

High capacity with a Competitive price

Offering exceptional value-for-money with all the quality and professional specification that you would expect from ARE. The storage cabinets are designed for the specific budget and requirements of a smaller business. A highly-economical refrigeration solution where budget and high-performance benefits to you and your business.

Features & Benefits

- Convenient for narrow workspaces or difficult access, helping you to maximize space.
- Removable gasket for easy cleaning, maintenance, and hygiene.
- Door lock for added security. Keep your contents safe!

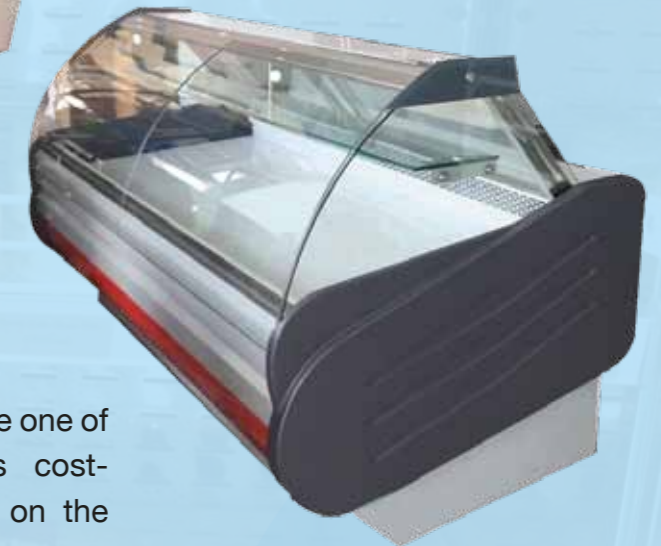

Multi-deck Display Chillers

Stylish Performance for Merchandise

Features & Benefits

- Exemplary design and manufacturing
- Class-leading capacity and features
- Unbeatable reliability across a range of different models
- Lockable security shutter available across the range keeping your goods safe overnight and preventing tampering
- Bright, clean and energy efficient LED lighting
- High-quality food safe with stainless steel finish for easy wipe clean efficiency
- Fully automatic defrost for efficient operation
- Intelligent controller with easy to read digital display
- Advanced airflow technology - merchandise maintained at an even temperature throughout the unit

Cheese & Cake Refrigerators

Flexible & Added Value

Chiller based, Curved-Glass Cake Display Chillers are one of the top-selling Display Chillers because of its cost-effectiveness. These are customizable depending on the design or style of your establishment.

Chiller has been a market leader in the industry, offering reliability and performance at very affordable price ranges. Presenting superior design and finishing, it excels in the versatility department with its specially customized forms. It's no wonder that these chillers are favorites among both small-scale establishments and mega-scale chain restaurants alike.

If you have a design in mind we can custom-manufacture a chiller/freezer for you!

Sales Accessories and Spare Parts

We care for your equipment and future

Advanced Refrigerations cares for your equipment and provides all kinds of spare parts and accessories required for commercial refrigeration systems. We make sure to keep one of the most important fields in the market, refrigeration, running smoothly with our wide variety of accessories and parts available. These include bulbs, panels, organizers, compressors, pistons, rings, repair kits, other electrical parts, and more.
